Promoting Research Intensive Environments In Clinical Settings

September 11-12, 2003

Natcher Conference Center

National Institutes of Health

Council for the Advancement of Nursing Science

The Council for the Advancement of Nursing Science (CANS) is pleased to present its second conference program, PROMOTING RESEARCH INTENSIVE ENVIRONMENTS IN CLINICAL SETTINGS. Designed for

▸ nurse investigators whose primary appointments are in the service sector or research institutes,

▸ nurse administrators committed to supporting and enhancing the research mission of their organization, and

▸ nurse faculty who partner with those in clinical agencies for programs of research,

this program is geared to all investigators interested in strengthening research in clinical settings and bridging research environments to advance patient care and the science and practice of nursing.

Conference Aims

▸ Build capacity and infrastructure for nurse-led research in clinical practice systems and settings

▸ Identify factors that lead to success for nurse investigators and programs of research based in clinical settings

▸ Analyze ways the mission of the clinical setting affects a nursing research mission

▸ Facilitate synergy and new types of partnerships for research collaborations within and across clinical and academic settings

Keynote Speaker

Kathleen Dracup, DNSc, FNP, RN, FAAN
Dean and Professor, UCSF
